LES ANIMAUX PREHISTORIQUES

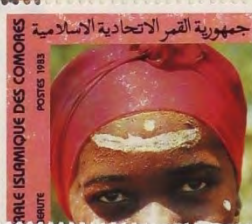

Les dinosaures étaient les animaux vertébrés dominants des écosystèmes terrestres pendant plus de 160 millions d'années, de la période triassique en retard (il y a environ 230 millions d'ans) jusqu'à la fin de la période crétacée (il y a 65 millions d'ans), quand la plupart d'entre eux est devenue éteinte dans l'événement Crétacé-Tertiaire d'extinction. Les 10.000 espèces vivantes des oiseaux ont été classifiées comme dinosaures.
